- Windows server

Summary

I have over 9 years of experience as a committed and effective full-stack software developer, proficient in various technology stacks for building web applications, mobile applications, and services. My expertise lies in MySQL, JavaScript, React, React Native, Django, and Django REST Framework. I possess exceptional knowledge of frontend technologies and state management libraries like Redux toolkit. With a solid understanding of the end-to-end SDLC

Experiences

Senior Software Developer, Amigos Sacco

Dec 15, 2023 – present

- The company allows customers to take a loan with some requirements expected to meet, The loan processing steps are hectic when done manually.
- The system includes the following sub system (<https://badregf.badregplc.com/guest/login>)
 - Copying User details, user savings and loan plan from the core banking system (fineract)
 - Document submission and verification
 - Loan approval / Rejection
 - Loan Disbursement details
- Reports of Loan
 - Collateral and Ability to pay analysis report
 - Agreement form
 - Guarantee Agreement document
 - Collateral Prohibitions letter
 - Repayment schedule
- I develop website for Sister company (Fiab realstate) using Angular <https://fiab-real-estate.vercel.app/>

Senior Application Developer, Badreg PLC

June 16, 2021 - Dec 15, 2023

- Engineered web applications with advanced functionalities like role-based authentication, and report generation.
- I have developed a React-based website for the Sister company (BADREG CPD center) <https://cpd.badregplc.com/>
- Developing a Learning Management System for the CPD Center, using the free and open source software package called MOODLE, enhancing organizational learning capabilities. <https://cpdlms.badregplc.com/>
- Utilized ReactJs, NextJs, Redux Toolkit, Django, and Django REST Framework for front-end and back-end development.
- I have developed different online subsystems based on the marketing department demands, the systems are used by around 25 field worker employees and marketers
 - Online order processing system <https://newp.badregplc.com/>
 - Customer evaluation system. <https://eval.badregplc.com/>
 - Quiz app for doctors based on their pre-registered professions

Technologies

Expert Level

React
React Native
(expo, expo router)

Angular
Django Rest Framework
Redux Toolkit

Skilled Level

NextJs
NestJs
Sequelize

Junior Level

Asp.net
Spring Boot
Laravel
Flutter

Education

BSC Degree in Information
Technology (Engineering)

Certificates

Server-side Development with
Nodejs, Express, and MongoDB
(Coursera - HKUST)

Front-End Web Development
with React (Coursera - HKUST)

Software Engineering:
Modeling Software Systems
using UML (Coursera -
University of Minnesota)

Responsive Web Design
Certification (FreeCodeCamp
Academy)

Language

Amharic
English
Tigrigna

Carrier Break

Feb 13, 2018 - Dec 15, 2023

- Exploring different technology stacks, such as ASP.NET, MEAN, MERN, LAMP and DJANGO.
- Accessing components of each stack based on ease of use, community support, documentation, security, available hosting (deployment) options so that I could make informed decisions.
- I have developed and tested RESTful services, building Rest API, and conducting end-to-end tests for enhanced system interactivity.
- I have practiced and developed continuous integration and deployment pipelines, accelerating software development lifecycle and improving release frequency.
- I have developed projects including a POS System (ReactJS, Angular) and a School Management System (using Asp.net then Django) to practice the tools and technologies I was trying to explore.

Junior Database Administrator, Accounting and Auditing board of Ethiopia

Jan 25, 2017 - Feb 13, 2018

- Managed and updated organizational website content, created WordPress plugins for data management, and performed regular database backup
- Installing and setting up WordPress, configuring settings for optimal website performance, and ensuring the security of the website.
- Selecting appropriate themes and customizing them according to the project requirements. This may also involve creating custom themes from scratch when necessary.
- Installing, configuring, and updating WordPress plugins to add new features or functionalities to the website.
- Checking compatibility with the website and making sure the new plugin do not affect the website performance.
- Assisting in the uploading and management of website content, including text, images, videos, and other media.
- Website Maintenance, management and Update. SEO Optimization.

Junior software developer, Custor Computing PLC

Jan 20, 2015 - Jan 25, 2017

- I have contributed to sales system development for DARO, employing C#, .NET technologies, and front-end design with Bootstrap and CSS.
- Tools and technologies we use: MS-Sql server, Visual studio, Devexpress & crystal report for PDF reporting, HTML, Bootstrap and CSS for front end and styling
- Proven experience of the C# programming language as well as use of .NET components like ASP.NET, WPF, LINQ, Entity Framework
- I experience Database first and code first ORMs.

NOTE: I have developed two mobile apps using react native for a local customer as a part time job.

It is not in google play store yet, but it will be released after the developer account is approved. I can demonstrate in person.
